

Chromatin And Disease

[DOWNLOAD HERE](#)

PART I: Chromatin Structure, Dynamics and Disease- 1 Structural organization of dynamic chromatin in humans.- Kohji Hizume, Shige H. Yoshimura and Kunio Takeyasu- 2 Chromatin Remodeling: Action and Reaction.- Parul Choudhary and Patrick Varga-Weisz- 3 Regulation of Chromatin Structure and Transcription by Poly (ADP- Ribose) Polymerase- I: Possible targets for drug based therapies.- David A. Wacker, Kristine M. Frizzell, and W. Lee Kraus- 4 Histone variant nucleosomes: structure, function and implication in disease.- Mathieu Boulard, Philippe Bouvet, Tapas K Kundu and Stefan Dimitrov- 5 Histone variants and complexes involved in their exchange.- Thomas Kusch and Jerry L. Workman- 6 Histone chaperones in chromatin dynamics: Implication in disease manifestation.- Jayasha Shandilya, Shrikanth Gadad, V.Swaminathan and Tapas K. Kundu- 7 Function of the histone chaperone Nucleolin in diseases.- Sebastien Storck, Manu Shukla, Philippe Bouvet- 8 Chromatin as a target for the DNA binding anti-cancer drugs.- Parijat Majumder, Suman K. Pradhan, Pukhrambam Grihanjali Devi, Sudipta Pal and Dipak Dasgupta- PART II: Nonhistone Proteins, Sites for Epigenetic Marks: link to Disease. - 9 Reversible acetylation of Non Histone proteins: Role in cellular function and disease.- Kiran Batta, Chandrima Das, Shrikanth Gadad, Jayasha Shandilya and Tapas K. Kundu- 10 MARs and MARBPs: Key modulators of gene regulation and disease manifestation.- Samit Chattopadhyay and Lakshminarasimhan Pavithra- PART III : Epigenetic Modifications of Chromatin : Implication in Disease and Therapeutics.- 11 Aberrant forms of acetyltransferases in human diseases.- Olivier van Beekum and Eric Kalkhoven- 12 Chromatin acetylation status in the manifestation of neurodegenerative diseases: HDAC inhibitors as therapeutic tools? - Anne-Laurence Boutillier, Caroline Rouaux, Panteleeva- 13 Function of MYST family Histone acetyltransferases and their link to diseases.- Nikita Avvakumov and Jacques Cote- 14 Role of histone phosphorylation in chromatin dynamics and its implication in diseases.- Masaya Oki, Hitoshi Aihara and Takashi Ito- 15 Function of euchromatic histone H3K9 methyltransferases, G9a/GLP. - Yoichi Shinkai- 16 Histone acetylation and methylation: Combinatorial players for transcriptional regulation- Woojin An- 17.Chromatin modifying enzymes and HIV gene expression.- Vincent Quivy, Stephane de Walque, and Carine Van Lint - 18.Small Molecule Modulators in Epigenetics: Implication in gene expression and

therapeutics.- V.Swaminathan, B.A.Ashok Reddy, Selvi R, Sukanya.M.S. and Tapas K. Kundu- Index
EAN/ISBN : 9781402054662 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Kundu,
Tapas K. - Bittman, R. - Dasgupta, D.
