You've found it. This is the best "finger-pullin" comedy ever. There are no number one hits here, but the amount of number two you'll find is truly mind boggling. I guarantee there won't be a dry seat in the house. 13 MP3 Songs COUNTRY: Modern Country, POP: Quirky Details: From the joys of flatulence to the excitement of previously enjoyed women, this album is a welcome return to zany, meat and potatoes comedy. This is not just silly, juvenile humor. You'll also find hilarious stories of the 'Seinfeld' variety set to mind-numbingly beautiful music. Bring your I.Q. and an empty bladder, and plan on having a sore stomach tomorrow morning. No kidding- this stuff is WAY better than the crap they play in church. And funnier too. Here's what the critics have to say: "Albums like this will take comedy right off the endangered feces list." The Gloston Bobe. "It's no surprise that the Brian Weeks Fan Club is growing at such an excremental rate." The Monthly Rag "I think the whole thing sucks." Al Gore "A circumcision gone wrong, this be like Jonestown with a much better punch line" The Ebonical Chronical There you have it! Be brave. Remember that time you bought the Carpenters double-album set? Here's your chance to redeem yourself. For a lousy ten bucks! Honestly, I think you're worth it. Thanks for listening. Use the force. In extreme cases, use the forceps.
