Indie. Acoustic. Rock. Those are the three words that describe Cadence. 12 MP3 Songs ROCK: Emo, ROCK: Acoustic Details: Cadence began in 2003 as a solo project for singer/songwriter Sam Hurd under the pseudonym "Eversincejuly." At first, Eversincejuly was an acoustic project, but that was changed to something much more with the addition of Todd Woodburn (violin, back up vocals), Greg McCracken (piano, string arrangements), and Steve Hadinger (bass). With a new name, and a new sound, Cadence has become an innovative group that combines many different music styles into something completely new. From straight rock songs to solo ballads, the strings, drums, and pianos form the perfect landscape for Sam Hurd's powerful acoustic songs. With mild success, Cadence is already being noticed by music fans and is getting some very promising attention. Their first full-length album, titled "Eversincejuly," is planned to be released in June '05, and shows with the new band are being planned for the fall.
