The laws of nature have been derived from ancient texts dating back thousands of years. They help explain human behaviour by linking personal character with the 5 elements of nature. 6 MP3 Songs in this album (111:15) ! Details: Over the years, I've seen many people waste many dollars and heart pills on relationships that are dead in the water. I've also seen people work themselves into the ground for no good reason. If we took all that wasted money that is spent on divorces and all the wasted energy working in jobs we hate, we'd automatically feed half the starving children of the world. The only people who'd suffer would be the lawyers and new age seminars moguls. Once, a long time ago, people were in harmony with Nature. They understood that their nature, and the nature of things was one topic. Those people might not have had the internet or space age weapons, or lots of modern conveniences but they had harmony. Most city people lost that harmony, and I want to bring it back using the Laws of Nature. There is one religion that doesn't change from country to country, culture to culture: and that is nature. She is the same whether you sit on a star or on a log in the middle of the Aussie desert, Nature's the same, she changes for no one. Now, I'm sharing the laws of nature so you, your loved ones, family and work colleagues can get on with making the world a good place for the future. I think there's a lot to be said for Nature. All the trouble and strife in the world comes when people deny or fight against the Laws of Nature, so, it seems smart that we relearn them. The environment inside us, and the environment outside us is the same thing. There are no secrets. You can't be an ass at home and a nice bloke at work. Or, be a new age guy at the party and be a total prick at work. We are one person and we are one people. So, we need an understanding of what it used to be

like to live in harmony. That's what these CDs are all about. It's straight talking, no bull, honest with no fluff. If you want fluff then this isn't the right program for you. But if you want to know the laws of nature and apply them to a modern context, then I really believe this stuff is leaps and bounds above intellectualising the whole thing and being righteous. It's about being humble, inspired and having lots of love in your life.
