Original, provocatively chaotic, heartwrenching, what the fuck is wrong with this world Rock'n'Roll. 10 MP3 Songs ROCK: Modern Rock, ROCK: Hard Rock Details: Infinitism n -s: 1 infinite (in'fe-nit) adj: being without limits of any kind: subject to no limitation or external determination. 2 ism (iz-em) n: a distinctive doctrine, theory, or practice. In Vancouver British Columbia, a talented group of super advanced apes develop music to define their generation. The band evolved from the fusion of a punk metal band, a folk rock trio, and the influence of a classically trained cello freak. For almost three years, this band has practically lived, breathed and eaten their music, often supplementing it with caffeine and THC. The five members of Infinitism first met in Junior High nearly ten years ago. After being apart for 5 years, Jai Mills and David Peters reunited musically after David returned from a European tour with the Bremen Youth Symphony Orchestra. Soon after Kaj Falch-Nielsen also returned to the island after graduating from the Victoria school of performing arts (Alberta) and they formed the David Peters Trio. At this time, Kai Johnson was attending Musicians Institute in Los Angeles, California. When he returned, his old punk rock group 'Useless Smile' (consisting of the Mills Bros and himself) merged with the folk rock group (David, Jai, Kaj) forming a five piece modern rock band. Within eight months of their first show, the band was in the studio recording their first indie album. Two years of playing the Island scene was enough time for the band to solidify their style, and convince them to move to the larger and more active music scene in Vancouver. The band is currently playing shows in Vancouver, preparing to record new material and planning their upcoming Invasion tour of Western Canada, which will be coming soon to a town near you. Get ready for Infinitism. "A mirror of the chaos and harmony of our time".
