Forced Opt-In And Sales Letter Personalization Software Here's The Secret To Growing Your Opt-In List Fast -- And Filled With Laser Targeted Prospects! When all the pros agree on something, it's usually a good idea to investigate and see if it's something you should be implementing, especially if it means more profits for your online business! How many times have you heard, The money is in the list! -- at least once or twice? The problem is that building a list takes time, and building a targeted list takes even more time! But a technique was developed a while back that some top marketers have been using to filter out the tire kickers and build a targeted list -- all at the same time. Here's Where Sonic Opt-In Comes In Sonic Opt-In is a piece of software that lets you fill in some blank fields and in just four steps you'll generate a complete forced opt-in page. But that's not all... ...Sonic Opt-In also does something really cool. Something that will increase your conversions as well as make your list grow faster. Personalizing a sales letter is a proven way to increase your sales. And since you're already obtaining the prospects name, why not use it in your sales letter? For example, at the beginning of this letter you saw Dear [fname] instead of Dear Friend. That was done using the personalization feature in Sonic Opt-In. Here are some of the main features of Sonic Opt-In: Steps 1 through 4 create your opt-in page, then only 2 steps to get it up and running on your site! Audio can be included in your opt-in page -- a special control is included. You can also choose whether the audio is autostart or manual start. Would you like a series of bullets in your copy? (These things you're reading now are bullets.) Special bullet editor allows you to include as many as you like! The prospects name and email are required. People who have already opted in are taken automatically to your sales page - no getting stuck behind the opt-in page again! Prospect can be taken to a special page targeted exactly to their interests. Depending on the prospects answers, subscribe them to different autoresponders. Now you can create sub-niche lists with ease! Personalize your sales page -- when you use the prospect's first name in your copy it increases conversions, [fname]. (insert grin here) Use one of the built-in HTML templates or create your own. Works with UltimateResponse.com, Auto-Responders.net, Aweber, Get Response, 1 Shopping Cart, Email Aces, etc., most of the major autoresponder services. Just requires the ability to subscribe to a list via an email address. Even works

without an autoresponder account for people who are just interested in the personalization feature. Get Sonic Opt-In right now and you can have your first opt-in page up and running in less than 30 minutes. And it'll only take you that long if you stop for dinner!
