

Web 2.0 Covers V1

[DOWNLOAD HERE](#)

"Easily create stunning covers in minutes, without Photoshop!" A lot of people have been asking me for a way to create quality Ebook covers and other eCovers without Photoshop. So after playing around with some ideas, I came up with something really cool... Web 2.0 Covers! The basic idea behind Web 2.0 covers is this... It's a template based system. You get 8 different templates, for 8 different eCover types. So you get 1 template for each cover. What makes these templates special is: Each template has a flat and straight front cover, so you can just type your text into the template without tilting and distorting the text in any way. Very easy to use. Each template also has some 3D elements to give it a 3D look. These 3D elements are already part of the template so you don't need to do anything extra. The 3D "look" is already there, so you don't need any other software or action scripts. Which means you don't need Photoshop (but you can use Photoshop if you want to). Each template comes pre-installed with 55 different "effects" that will spice up your cover. And all you have to do is check or uncheck the effect you want. This makes creating an eye catching cover super easy. Each template also comes pre-installed with 20 different "shapes" like half circles, bars, rectangles, etc. So you break up your cover into sections and add some more eye candy to the cover easily. Each templates is highly customizable, and each part of the template comes on it's own layer that you can customize in pretty much any way you want. Mix and match the effects, resize and distort anything you want, change colors, etc. So with each template, you can create literally millions of different combinations of covers. So your cover won't look like all the

other covers out there that are using these templates. This package also comes with 90 Web 2.0 layer styles. So you can easily colorize and add some gradient effects to any element on the cover with just a few clicks. These templates are extremely flexible. With them you can easily create pretty much an unlimited amount of quality looking covers, in minutes. I don't think it can get much easier than this. Lets recap about what you will receive... 8 templates in PSD format.. 55 pre-installed effects on each template. 20 pre-installed shapes on each template. 90 Web 2.0 layer styles. A step-by-step Video Instructions Original sales page in english and german. Images and a Master Resale Rights License Privacy Policy-, Earnings Disclaimer-, Terms and Conditions Page. We are authorised Reseller and in the possession of the necessary licences for this product. Therefore we do not offend against the copyright! For the software & scripts no Support can be performed!
