

# From Hyperbolic Systems To Kinetic Theory

[DOWNLOAD HERE](#)

1;Preface;7 2;Contents;25 3;1 Historical Perspective;28 4;2 Hyperbolic Systems: Riemann Invariants, Rarefaction Waves;44 5;3 Hyperbolic Systems: Contact Discontinuities, Shocks;58 6;4 The Burgers Equation and the 1-D Scalar Case;66 7;5 The 1-D Scalar Case: the E-Conditions of Lax and of Oleinik;72 8;6 Hopf s Formulation of the E-Condition of Oleinik;78 9;7 The Burgers Equation: Special Solutions;84 10;8 The Burgers Equation: Small Perturbations; the Heat Equation90 11;9 Fourier Transform; the Asymptotic Behaviour for the Heat Equation100 12;10 Radon Measures; the Law of Large Numbers110 13;11 A 1-D Model with Characteristic Speed;118 14;12 A 2-D Generalization; the Perron Frobenius Theory124 15;13A General Finite-Dimensional Modelwith Characteristic Speed 1e;132 16;14 Discrete Velocity Models;140 17;15 The Mimura Nishida and the Crandall Tartar Existence Theorems;156 18;16 Systems Satisfying My Condition (S);162 19;17 Asymptotic Estimates for the Broadwell and the Carleman Models;170 20;18 Oscillating Solutions; the 2-D Broadwell Model176 21;19 Oscillating Solutions: the Carleman Model;184 22;20 The Carleman Model: Asymptotic Behaviour;190 23;21 Oscillating Solutions: the Broadwell Model;196 24;22 Generalized Invariant Regions; the Varadhan Estimate206 25;23 Questioning Physics; from Classical Particles to Balance Laws214 26;24 Balance Laws; What Are Forces?224 27;25 D. Bernoulli: from Masslets and Springs to the 1- D Wave Equation;228 28;26 Cauchy: from Masslets and Springs to 2-D Linearized Elasticity;236 29;27 The Two-Body Problem;240 30;28 The Boltzmann Equation;246 31;29 The Illner Shinbrot and the Hamdache Existence Theorems;256 32;30 The Hilbert Expansion;260 33;31 Compactness by Integration;266 34;32 Wave Front Sets; H-Measures272 35;33 H-Measures and Idealized Particles ;278 36;34 Variants of H-Measures;284 37;35 Biographical Information;294 38;36 Abbreviations and Mathematical Notation;298 39;References;302 40;Index;304 EAN/ISBN : 9783540775621 Publisher(s): Springer, Berlin Format: ePub/PDF Author(s): Tartar, Luc
