COME ON IN. "The New Voice of Rock music is here". If you listen to Rodgers, Gramm, Coverdale or Scott this one's for you. 10 MP3 Songs ROCK: 70's Rock, ROCK: Classic Rock Details: NEW DYER STREET CD! "WEST COAST TRAGEDY" AVAILABLE WORLDWIDE October 2004 Dyer Street was formed in Los Angeles, California where the band went into the studio to start working on their debut CD. Their goal was to create a CD that would stand up against their favorite rock albums of the 70's. The process began with the collaboration of Jesse Wray and Dave Nelson who started to lay the groundwork for what was to become "The Rock Album". The first and most important element in making a great record is the songs. The result is a CD full of great album cuts like "The Question" and "Set Me Free" along with three or four potential hit singles like "Deaf Dumb n Blind", "I Sold My Soul For You" and "I'm Your Fool". The Dyer Street personnel starts with Dave Nelson, simply the best rock voice to come out in the last 10 years. It has been said that Dave's vocals have the breath of David Coverdale, the attack of Lou Gramm, and the feel of Paul Rodgers. Jesse Wray is the bands lead guitarist whom also produced the new CD. The guitarist comes from the Jimmy Page, Joe Perry and Alex Lifeson school of playing. Danny Lorenze is one of the most sought after drummers in Los Angeles. Danny is a solid rock drummer influenced by John Bonham, Ian Paice and Neil Peart. And then we have James Hancock, who brings to the table just what doctor ordered. James plays organ with the conviction of Jon Lord and if you find yourself at a live Dyer Street show you won't believe the amount of sound coming from his side of the stage. Now that Dyer Street has completed what they call "The Rock Album" the band feels confident that this CD is a must have for rock fans around the world.
