

Mp3 Escape Velocity - Chaos Theory

Imagine Rufus Wainwright singing Beatles melodies with the hard, but quirky edge of Weezer... other influences include Violent Femmes, the Shins, Beulah, Ozma, and Of Montreal. 12 MP3 Songs ROCK: Modern Rock, POP: Beatles-pop Details: "Super simple perfect pop songs about love, love, love. They sound a lot like the less psychedelic members of the Elephant 6 crew. There's hardly a bad song on here, from the power-pop opener Don't Push Me Away, the slinky, loungey acoustic Fall In Love Again, and the maybe the best song on the album, Gwynneth. I think their version of Sleeping In A Beetle Bug may be better than the original. Singer Michael Chagnon has a great vibrato and a charming Westerberg-like snarl that works wonders on The End of The Real World. The recording quality and mix is remarkably good for a self-produced, independent release. If you dig the poppy side of Elephant Six - bands like Minders, Of Montreal, Apples In Stereo, Marbles, you'll flip for this band - myspace.com/escapevelocityva or buy it from cdbaby.com/escapevelocity for the nice price of 8 bucks US greenback dollars."
