Alternative folk edged soundscapes of sour dreams and lyrical beauty. Cohen meets Dylan meets Reed. 10 MP3 Songs FOLK: Alternative Folk, FOLK: Free-folk Details: the biological state of the band is mostly human with a dash of alien bikini vampires. the biographical state is mostly classified, however here is a short extract from carvings found on a plastic milk bottle deep in the skip at the back of ASDA...To whom it may concern... There have been many rumours of my existence and most of them are true. I was raised by wolves in southern Italy after my parents were , i am told, taken up in a rather shabby looking space craft whilst we were on holiday in Bournemouth. It was then at the age of twelve that i too was taken up in another even more shabby space craft by a group of pleasant if uneducated vegetarian vampire bikini aliens...i do not remember a great deal about this event or indeed the following thirty years until the point when i was returned to this fair planet and indeed in Cardiff. I have no real idea of what occurred during those years other than i find myself with the ability to scrawl an image or two,a vegetarian [who eats fish [[probably some halfway house that the alien veggie vamps had to adopt]and an artist with an inclination to play leonard Cohen songs. If you too find that any of the above apply to you then ...good luck!
