

Mp3 Larry Tomaso - Essence Of A Dream

[DOWNLOAD HERE](#)

A blend of ambient, trancelike music featuring electric guitar, guitar synthesizer, synth modules, exotic rhythms, futuristic textures and soundscape realms. 8 MP3 Songs NEW AGE: Ambient, ELECTRONIC: Soundscapes Details: My passion for music started at age nine. I've toured extensively throughout the U.S and Europe with various musicians playing guitar and bass. I've always had a fascination for natural and synthetic sounds and for exploring the infinite possibilities of creating new and unique soundscapes. All of the music on this CD was created entirely in my home studio using a Pentium III computer. The aural soundscapes used are a combination of crossfading sampled, synthesized and natural sounds, then processing these files even further to achieve complex sweeping, floating, dreamy sonic delights. Electric guitar and my Roland GR-1 guitar synth were then overlaid on top of the computer and midi generated music to give the pieces a more human touch. The creation process just seemed to come naturally, or magically out of nowhere. I am only a channel thru which the music flows. Most of the tracks evolve over time to create a soothing, peaceful, dreamlike, hypnotic state. My wish is to take you on an aural journey to transcend the inner galaxies of your mind.
