Scarlet Slipping has been described by reviewers as "haunting" "angelic" and "hypnotic." Scarlet Slipping often falls into the gothic/darkwave category by others but would rather self describe as layered, moody orchestral music with Celtic influence. 9 MP3 Songs ELECTRONIC: Ambient, ROCK: Goth Details: " -Her music is filled with lush, synthetic orchestral textures, haunting, otherworldly noises and insistent, sometimes even thunderous drums. Every sound, every note and every lyric created by this one woman." - DJ\_Oxygen, Mpls darkwave dj. "It's a very powerful album, I'm quite enraptured by it." "on this album you sing from your heart displaying a great deal of vulnerability with a 'look but don't touch' approach. I can hear that even though you bear your soul that you are most definitely guarded and why shouldn't you be? The rawness and realness of it is only made more plain and more powerful by the performing style you have adopted... I truly love it." Jason Wallach of The Unquiet Void
