This CD is a compilation of three of Mo'Valley Records' recording acts, EN DA MYX, Klunis, and Jaguar. We've got a touch of R&B funky grooves mixed with rap and R&B vocals. Each style combined together sets us apart from the ordinary groups. 14 MP3 Songs URBAN/R&B: R&B Rap mix, HIP HOP/RAP: West Coast Rap Details: SummerStone's self-titled debut album is produced by Eddie "Klunis", a co-member of SummerStone, who was an original member of the legendary group Bloodstone, whereas he captures R&B funk with rap and R&B vocals. He saturates the hit single Wrong Number with his falsetto, while the rap beneath it is off the hook! Our producer has also worked as an independent producer, arranger and musician, and wrote songs for Motown Records with several of their legendary hit Artists, as well as an independent arranger and producer for Artists on Arista Records, not excluding a session musician for several big name acts on Warner Bros. and Atlantic Records. He's also had songs he has written and co-wrote for Grammy Winning Artists. That's why SummerStone has a wide variety of creative support, with it's duo rap team with Sly-ish overtones and Bloodstone's falsetto, supported by their female vocalist, it's headed to be very successful. SummerStone is currently on Mo'Valley Records, whom is seeking a merger with a Major Label. The female vocalist Jaguar captures the old school flavor as well as today, with a TLC overtone, with the song entitled Give It To Me. Some selections have melodic rap, somewhat of a Nelly style with falsetto harmonies in the background. But one of our main features is the young female and male rap duo EN DA MYX, which is a part of SummerStone, whereas their overlapping style is lyrically astronomical that usually speaks for you, just like the old school songs once entailed.
