8 Profit Pulling PLR Strategies Audio 7 Discover My 8 Totally Unique, Profit-Pulling Strategies That YOU - Or Anyone - Can Use To Rake In MASSIVE Recurring Profits From Private Label Rights. . . Starting Today. 10 MP3 Audios + PDF Master Transcript. For The First Time Ever... YOU Too, Can Unlock The Secrets To Mastering Multiple Unique, Profit-Making Strategies That You Can Use To Build Your Online Empire With Private Label Content! I can only teach a finite amount of people if I had done it on a one-on-one basis, so I conceived this full-blown course where I reveal EVERYTHING I have learnt in the past years that can bring you massive success with making money from Private Label Rights. This is not something that you already know so well of. I have been keeping tabs on other 'PLR Expert' wanna-bes in the Internet Marketing arena and they're not even talking about what I'm sharing in my 8 PLR Profit Strategies That Really Work! course. Here's What You Will Learn In A Nutshell . . . PLR Profit Strategy #1 How I get people to pay me and then build my mailing list! You will also learn that this exact technique has helped branded me in the process as an authority figure in my chosen niche. The concept behind how I pulled in \$19,576 in total sales in 6 days, brought in 300 paid customers, and 3,000 responsive leads into my autoresponder account under 2 months! Why basement price sale is for losers... I have nothing against pricing your products low ticket for the 'low hanging fruit' market but I seriously think people who resell products at \$0.99 to \$5.00 shouldn't be online at all. If you want to be rich and make big

money, you have to think BIG (and this is what my course is all about!) Why you can still pull this off even though you may have no product yet, no list or even no established credibility yet! I have taught this in my interviews with other Internet Marketers before and also some of my close business associates and since then, they started to get more subscribers and later increase in sales. How to make use of the same PLR products to make money and build your opt-in mailing list, even if other resellers are already selling it. I have disproved a common myth that one cannot make money if the PLR product is too saturated, and my "\$20,000 case study" in itself, is irrefutable proof. +And Much More... You Get The Complete 'Modus Operandi' Behind This Highly Profitable PLR Strategy! PLR Profit Strategy #2 Just by shifting the focus "a little", I could greatly increase the perceived value of my products even though they were re-worked Private Label Content acquired at free to low cost. The same process I went through when creating membership levels that sold for \$67, \$97 and \$147 each - and they've been selling consistently since 2006... even to this day! (the membership site makes \$25,000 a year in sales for upgrades alone!) Low cost membership scripts that you can get at affordable prices and are easy to install... even if you don't know how to, they are backed by good customer support as I have been using them for years. How NOT to make this a 'typical' PLR membership site - there are already too many of those sites and it's becoming over competitive. I'll show you how Resell Rights Mastery is different from other membership sites of its kind, and how you can duplicate its success for incredible results in any other niches... +And Much More... You Get The Complete 'Modus Operandi' Behind This Highly Profitable PLR Strategy! PLR Profit Strategy #3 This strategy can help sky rocket an anonymous marketer into Internet Marketing stardom! This strategy is similar to PLR Profit Strategy #1 in many respects... only faster and easier to do! (although this means the benefits and advantages are also less compared to PLR Profit Strategy #1) How you can build your name virally and pump red hot leads into your autoresponder account aggressively! A little known profit center you can tap into and make money from your readers, and as a 'side effect' put a catalyst into the viral distribution of your E-Books! Anyone with no credibility (yet), no product and no list can take advantage of this PLR Profit Strategy starting today... +And Much More... You Get The Complete 'Modus Operandi' Behind This Highly Profitable PLR Strategy! PLR Profit Strategy #4 You will probably make the headlines if you can pull this feat by running the lives of a string of Internet Marketers and build your online media influence exponentially! Hardcore, unique list building strategy never revealed or thought about by other Internet Marketers... until I discovered this. How to make a highly

profitable income from a string of online newsletters, and tap into an undying market of opportunity-seeking advertisers! (Depending on how big you build your online newsletters, you can charge anywhere from \$50 to even \$300 per advertising space!) And yes... you can achieve all these using Private Label Rights content! Aggressive list building strategies to build your list quickly, keep subscribers and lower your un-subscription rate... +And Much More... You Get The Complete 'Modus Operandi' Behind This Highly Profitable PLR Strategy! PLR Profit Strategy #5 This technique can separate you totally from the rest of the PLR junkies with the "hobbyist" mentality especially when you begin comparing the size of your bank accounts. Turn your hard drive collection of Private Label Rights products into an active gold mine with this strategy! How to develop a USP (or Unique Selling Proposition) for your own online vault and make money... either through one-time payments or monthly billings and earn residual income! How to get members to your membership site! +And Much More... You Get The Complete 'Modus Operandi' Behind This Highly Profitable PLR Strategy! PLR Profit Strategy #6 The secret of many TOP Internet Marketers who THINK BIG and DO BIG with the FEW Private Label Content they have and EARN BIG. How to create your own comprehensive Information Products in record time, using only Private Label Content! How to go middle or high ticket with this PLR business model! +And Much More... You Get The Complete 'Modus Operandi' Behind This Highly Profitable PLR Strategy! PLR Profit Strategy #7 I make \$1,500 - \$4,500 every time I do this, and the product development cost is often close to zero. This is the same strategy I used to help a guy who was \$10,000 in debt and he owes his jumpstart in Internet Marketing to this. It was life changing for him... it could be for you too. I used to make anywhere from \$1,500 to \$2,000 every time I used this strategy in 2006 through 2007. I later perfected it and started making \$4,500 to even \$5,000++ just recently using the same PLR Profit Strategy! The 'hamburger' analogy... how value adding spells profits in this PLR Profit Strategy, and again another proof why your competitors and their petty 'basement price selling' is irrelevant to how much money you plan to make online! This strategy is highly duplicable with other people's PLR products or even Public Domain content as long as they have no restrictions to their use. +And Much More... You Get The Complete 'Modus Operandi' Behind This Highly Profitable PLR Strategy! PLR Profit Strategy #8 Want to be wealthy? Think like the Dummies *hint*. How you can quadruple your cash points like what the Dummies guides are using in book shops... but believe it or not, you have a better advantage of closing a higher percentage of sales simply because you're using the Internet! How to pull this off in quick

succession and build a stronger brand name using Private Label Content. This is the same Private Label strategy applied by retail stores like Giant, Tesco and Wal-Mart. Spawn multiple low-ticket products with Private Label Rights and create an exponential network for exponential income! This is exactly how my \$10 products sell in volumes for long periods of time in addition to my middle- and high-ticket products in the marketplace. +And Much More...
