A obtuse maelstrom of heavy ambiance, perverted rhythms and devastating make noise Unkeyed drifting sounds, overhead 747s, and all the things urban nightmares are made of. Truly the sound of alienation and paranoia. 13 MP3 Songs ELECTRONIC: Soundscapes Miscreant Songs Details: Acclimate is an intensely visceral aural experience that does exactly as its name implies-- it introduces the listener to new sounds and noises and bends the boundaries of conventional music and countless genres into a collage unlike any other-- forcing the listener to re-evaluate his senses and perception of the norm and then adapt to the strange and alien atmosphere around him. The new "Miscreant" cd is a collection of both old and new Acclimate works, and also features Japanese Minimalist AUBE as a guest artist. In addition, Mago of the label Ad Noiseam (and also of Azure Skies on Ant-Zen and Sanctum on Cold Meat Industries) is present doing a final "Mega-Mix" of several of the tracks. The result is sure to please both the purest noisehead and dancefloor fanatic alike. Older material that was never before released and was initially felt to lack that certain "something" has been painstakingly reworked, rerecorded, and revamped over many sleepless nights in order to be able to finally bring them to you. These compositions, combined with the newer material on the disc, take the listener on a wondrous journey, travelling both through and beyond the vastness and coldness of space, the horrors and mechanization of urbanized society, and most importantly, the innermost recesses of the mind. Not always pleasant, most times dark and brooding, but always, nonetheless, Acclimate.
