

# Nucleic Acids Hybridization

[DOWNLOAD HERE](#)

Contributing Authors- Preface- Acknowledgements- Nucleic acids hybridization: potentials and limitations - Anton Buzdin - Selective suppression of polymerase chain reaction and its most popular applications - Sergey Lukyanov, Konstantin Lukyanov, Nadezhda Gurskaya, Ekaterina Bogdanova, Anton Buzdin- Suppression subtractive hybridization - Sergey Lukyanov, Denis Rebrikov, Anton Buzdin- Stem-loop oligonucleotides as hybridization probes and their practical use in molecular biology and biomedicine - Anton Buzdin, Sergey Lukyanov- Generation of normalized cDNA libraries- Alex Shcheglov, Pavel Zhulidov, Ekaterina Bogdanova, Dmitry Shagin- Primer extension enrichment reaction (PEER) and other methods for difference screening - Lilia Ganova-Raeva- Subtractive hybridization with covalently modified oligonucleotides - Shi-Lung Lin, Donald Chang, Joseph Miller and Shao-Yao Ying- Coincidence cloning: robust technique for isolation of common sequences- Anton Buzdin- DNA hybridization in solution for mutation detection - Anton Buzdin- Current attempts to improve the specificity of nucleic acids hybridization - Anton Buzdin- Concepts on microarray design for genome and transcriptome analyses - Helder I. Nakaya, Eduardo M. Reis and Sergio Verjovski-Almeida- Index EAN/ISBN : 9781402060403 Publisher(s): Springer Netherlands Discussed keywords: Nukleinsure Format: ePub/PDF Author(s): Buzdin, Anton A. - Lukyanov, Sergey A.
