Orbital Atom Heart should consider this download. Details: This latest release from underground
electronica artist Efofex is regarded by some as the long awaited follow-up to his debut release "Proof"
from 1998 (currently out of print). The elusive keyboardist/synthesist quietly "working the controls" behind
the Efofex persona is known in the real world as John Talbert and has actually been quietly producing
electronic music behind the scenes for more than a decade. But in the brief period of time he has decided
to take the music "public," Efofex has already become internationally notorious for his intimate, moody,
and "from-the-heart" approach to electronic music production. In signature Efofex works thus far,
melodies are often created with quite non standard timbres (the melody on the opening track on Stress is
said to have been created using the sound of a dentist's drill!) while rhythmic undulations run the gamut
from hardcore funky to silky smooth and every flavor in between. All the while, all sorts of swirling
synthetic worlds twist and develop in the background. So what does the Stress CD itself sound like? In
Mr. Talbert's own words: "...[Stress] attempts to express in common Efofex language...how real life might
be experienced for many of us. For instance, things are fine, even rather pleasant...yet at times minor
annoyances creep up that 'stress' us out, so to speak - until things [finally] reach a feverish pitch. And just
as things appear to be at their worst, the storm subsides and life is magically once again restored to
normal." If that isn't solid proof of the moody nature of Efofex's work, then what is?
