

Mp3 Groove Weaver - Long Way Around

[DOWNLOAD HERE](#)

Funky groove music, with a smooth jazz topping; hard hitting drums, deep bass, mixed with horns, guitar, piano, and whatever other sounds fit. 7 MP3 Songs JAZZ: Free Jazz, ELECTRONIC: Funk Details: ABOUT THE MUSIC: These songs are all instrumental, with no vocals. This music was made using a keyboard and a computer. Using the onboard groove box and 6 track recorder on the keyboard, I recorded a basic drum beat with variations, then layered the various sounds using the keyboard. I then transferred the songs to my computer system, adjusted the levels, and converted them to different formats. ABOUT ME: I am a 33 year old married father of a five year old daughter, and three year old son. I am a full time dad, protector, and home maintainer. I have played guitar, bass, hand drums, and keyboard for many years. I have played in bands, and jammed with many people. I have always wanted to create songs from beginning to end by myself. This project was the completion of that goal. My next goal is to get a better studio with some more instruments, and to keep creating cool, original music. Paul Sutherland Groove Weaver
