GOTHIC CHICK BEATDOWN: Now hold on tight and take notice people, because the following beat down clip is not intended for the faint hearted or squeamish amongst you and therefore regarded as very extreme, and just has to be one of my most favorite sessions ever witnessed. Located and filmed in total privacy at the UKGC studio, we gaze on in amazement as our pain crazy punch bag Mark is seen going head to head with one of the hottest Gothic girl fighters I know called Fatality. The NCIS Abby look alike starts out by sealing Marks mouth firmly shut with gaffer tape, as she proceeds to deliver a devastating skull targeted beat down that I will never forget. Punch after punch is thrown and taken by Mark as she takes him to the edge of insanity.....a real collectors special that everyone will talk about.
