Elegant electronic improvisations and soundscapes. 10 MP3 Songs in this album (68:50) ! Related styles: ELECTRONIC: Ambient, ELECTRONIC: Experimental People who are interested in Tangerine Dream Brian Eno Robert Rich should consider this download. Details: Experimental electronic music is always a favorite at Machine Tribe Recordings and this freshman release by Abstract Audio Systems more than hits the mark in that respect. From the flute like noodlings of "fiark" to the growling synths of "morpheus kiss", SomeNothing is a musical adventure into the abstract. Most of the tracks were done in one take with little post production. Abstract Audio Systems continues to shy away from conventional song structure, although arpeggiated songs like "arp" and "secher" reveal a melody conscious undercurrent in all the tracks. Challenging at times, engaging all the time. This release also contains Puzzleboy's beat-heavy, acid-drenched remix of "morpheus kiss".
