Bernd Haussmann " Bobs songs are sad, romantic, raw , sophisticated , sweet, and beautiful but most of all they are deeply personal and profoundly present ". " I believe that good music is a testimony of an intimate moment. It comes from a deep honest place whether it be love or pain, and originates from visiting an unbeaten path. This type of music attempts to encapsulate the listener, cutting through his or her barriers enabling them to also have private experience with themselves. This personal conversation continues to vanish in the world of music." BOB MERRIGAN
