acoustic delicious, an angelic voice with guitars sauce 10 MP3 Songs COUNTRY: Modern Country, FOLK: like Joni Details: Featured Musician / Music Artist KAYLA - Carrie Lennard Watch out for Carrie Lennard in the up and coming contemporary folk music scene. Carrie's sweet, angelic voice, fine acoustic guitar skills and personal lyrics paints masterpieces of emotional snapshots on her current album, "Kayla". Carrie's voice, (and what a voice!), invokes favorable comparisons to Joan Baez and Joni Mitchell. Her style, though, is her own and shines with a rich luster on tracks 1, "You Make Me Sing" and 10, "Kayla". Track 8, "Poisoned Words" is my personal favorite. This is a powerful, anger driven, blues tinged song that highlights an edgier aspect of Carrie's voice not found elsewhere on this CD. The creative bass work by Joe Parker on this track is outstanding. Julz Parker added to the charm of this project by producing this professional sounding CD. Music Medley Review 2005
