

Mp3 Ces "z" - Up To D/a/t

[DOWNLOAD HERE](#)

This is a mixed of industrial and dark-wave music. But we must say to be fair and more precise about it, that this album has got a shiny side. You can find on this CD musics for dance floor and musics to be scared. 5 MP3 Songs ELECTRONIC: Industrial, ELECTRONIC: Experimental Details: Ces"Z" is a solo band from north of France. The project begins with the EP "Up To D/A/T", a five tracks CD. The first song is a tribute to the Cronenberg's movie "Videodrome" with James Woods. A remix which is really excellent now exists. You can download it... The second track is a typical darkwave dancefloor song, with a little disco touch. The thirt title is groovier and will give you sexual desires. The fourth song is more a living nightmare, where you can here scream tortured people, in a pervert musical progression. The last track is really well executed darwave song, with a clever evolution. This first five tracks CD is full of ideas, it is never boring, because the artist always apply variations on his musical themes. History has it that Ces"Z" began playing at the age of 6, he soon understood the beauty of creating his own partition. When he was 12, obtained an Atari 1040stf with a Roland kr 500, with this equipment Ces"Z" could experiment his first composition using computer. Then he integrated some famous band in the north of France as Klone. Soon, you could download a lot of new "file-tracks" from Ces"Z". Enjoy this moment
