Electronic pop at its best. 14 MP3 Songs ELECTRONIC: Dance, POP: 80's Pop Details: One of electronic musics most treasured bands, Germanys !distain presents this unique, limited-edition compilation consisting of equal parts greatest hits material and traditional remix album. The project was born from the bands idea to re-record vocals of popular songs over their decade long career. Current members, Alexander Braun and Manfred Thomaser spent intermittent studio time between working on songs from their upcoming album and the best-of record. The question soon became, however, that with fresh vocal recordings accompanying these older tracks, the music itself might require a makeover as well. Soon, word on the internet spread like wildfire about the project and several bands, DJs and solo artists accepted invitations to fashion favorite !distain songs into new, exciting interpretations. The result, over a year in the making, is now here for you to enjoy.
