Pop, Jazzy,Folk, Americana alittle bit of listening flavors goes a long way. I got more flavors than fruit stripe gum. 6 MP3 Songs FOLK: Modern Folk, JAZZ: Jazz Vocals Details: In-Tune-ition: The innate ability to write music intuitively. At the heart of my music lies the seed of this inspiration; developing tensions between complex rhythmic chords and simple melodies. Or is it the other way around? Jazz-like chords are balanced with simple guitar riffs that set the emotional pace for each song. My voice controls the mood by either following the melodic line or shifting into counterpoint mode. Throw in some Funk and Americana influences and youll hear a colorful mix of musical flavors. I really like to listen to pop, jazz, funk and even some quirky music. I guess this is why I like to write in many styles of music and not in one genre. I write; it is my passion in my life. And, its fun. I hope you will listen to, relate to, and sing along with my songs.
