

Mp3 Steve Dore - Inflation Nation

[DOWNLOAD HERE](#)

"Only gold and silver shall be money", our constitution says. But no... we've got Fed Reserve Notes. OUR OWN MONEY IS ILLEGAL. This concept CD is for all of us concerned for our own financial health and well being. 14 MP3 Songs COUNTRY: Country Pop, BLUES: Guitar Blues Details: Each cut of the 14 songs on this very pertinent CD carries a powerful and important message. 40 years of full time writing and performing by this MCA recording artist have culminated in this collection of songs targeted to those of us interested in preserving what we have earned in this life. It is ahead of its time because most of us are just too busy spending our precious time working to make ends meet, than trying to understand the very difficult subjects of the Federal Reserve, purchase power, precious metals, INFLATION and dealing with how we are basically being robbed and abused by our own government. Our spend now (money we do not have), pay off never schemes are being shoved onto our children and their children as we are hand them the unprecedented injustice of ever increasing records of debt. Protect yourself and your children as this can not continue. Gather things that have real value over pieces of paper, promises and clicks on the computer. Gold and silver have been money for 5,000 years for a good reason! Our founding fathers knew what they were talking about when they said in our constitution that only gold and silver shall be money. This CD strives to educate and entertain. The music is progressive roots. The proficiency of contributing professional musicians combined with knowledge based facts about our present approaching financial melt-down puts this CD in a category all of its own. It is a concept CD, a political CD, and a musical CD ready for prime time. It is a guide for any who would consider where they are in life and how they might protect what they have now. INFLATION is a horrid beast unleashed on us by a fake branch of government which is merely a private banking cartel known as the Federal Reserve. They make money out of absolutely nothing but thin air! Think about that for a minute. Lies and thievery

on the grandest scale. We would all agree that money is pretty important stuff. It affects all of us deeply, who would struggle to pay our bills and save for a rainy or an approaching retirement. Our unbacked paper money system, only valid by government fiat, deteriorates further by the minute (we have already lost approx. 97 of our purchase power since the Fed was created). As gold and silver increase in dollar amounts, the sad truth of the Federal Reserve scam will be revealed. You are losing your paper wealth as you read this due to INFLATION. We are an INFLATION NATION. More songs, blogs, and updates are at the inflationnation.us. Please learn all you can about what your money is and where it comes from so you can have a bit more of it when you really need it.
