From the reviews: This concise book is written for a broad audience of basic science and clinical researchers interested in cancer biology, as well as those interested in the identification and directed differentiation of adult and embryonic stem cells. The author's clear writing style will appeal to young scientists and nonexperts who are interested in cancer stem-cell theory. is captivating, fascinating, instructive, and well written. The book is fun to read. This is a welcome addition to the literature on cancer biology. (Bruce A. Fenderson, Doody's Review Service, July, 2010) EAN/ISBN : 9781441959683
