Autoresponder Magic! Auto Responder Magic Will Help You Put Your Web Sites Sales On Autopilot! A Massive Collection of Winning Autoresponder Messages to Model, Copy and Swipe! Dear Friend, Are you getting the most out of your traffic? Fact: A recent study conducted by Sales and Marketing

Executives International concluded that 81 of major sales are only closed after the fifth contact! Fact: 80 of people who inquire about a product or service will buy it within one year of their initial inquiry. However, more than 90 of the time, they dont buy from the same company that they made their initial contact with. Whats the quickest and easiest way to massively increase your web sites profits? If you said, Get more traffic - youre dead wrong! By far, the easiest and most cost effective way to dramatically increase your bottom line is simply by increasing your follow-up efforts. Thats right. The startling truth is unless youre constantly and systematically following-up on prospects, you are literally throwing away wads and wads of cash! The problem: How can you continually and automatically follow-up with interested prospects? The answer: Sequential Email Autoresponders. In case youve never heard of autoresponders let me briefly explain how they work The Inside Scoop on Autoresponders Email autoresponders work like a fax-on-demand system. Maybe youve seen the systems where you call from your fax machine and dial a certain code and youll get back a document in your fax machine? Well, an email autoresponder works the same way. If you send an email to an autoresponder address youll get back a prewritten message. Until just recently, you could only do a one-time auto responder with one message coming back. But now you can set up a whole sequence of autoresponder messages going out on any day you choose. For example, message #1 might go out immediately, then message #2 goes out 2 days afterwards, next message #3 goes out on day 5, then day 8 comes another message, etc, etc. Do you see the real beauty of this whole thing? Its unbelievable. And the best part is everything is done automatically for you because its triggered when a prospect submits their email address. So that means you can simply set up your system once and then it keeps working over and over again like a tireless moneymaking robot making sure no prospect ever slips through the cracks. With all these advantages, its really no wonder why sequential Autoresponder services like Aweber and Get Response have taken off so quickly. These new systems are absolutely fantastic! But there is one big, glaring problem. Do You Know What It Takes To Write a Winning Autoresponder Series? If you dont, youre not the only one. For most people creating a series of autoresponders that convinces people to part with their hard-earned money isnt as simple as it looks. Most people just dont know where to start, how many messages to send, when to send them, how to ask for the order, or any other number of variables that mean the difference between success and failure. But, now theres good news! Theres a new resource that will help you create your own successful autoresponders - and its called Autoresponder Magic: The Ultimate Collection of Winning Autoresponder
