Think about it... anytime you create a new site - you simply turn the tap on... it's like having the goose that laid the golden egg. Sounds to good to be true? TIMEOUT: James Comer Albuquerque, New Mexico James@mzeen.com Affordable, Easy to Use and the Search Engines Spiders can't get enough! James, works part time on the net and after using Instant Blog and Ping not only has he managed to have more time to get more sites created but best of all, his current sites are getting crawled and indexed faster !! He noticed Crawling began within 4 days of using the software! Here is What James Had To Say I build a lot of websites online- both manual and using the help of page generators. For a long time, I have been frustrated by the length of time that it takes just waiting to get my sites spidered and indexed. Although I did find that manually blogging and pinging helped- the time that it took to post a few lines from every page of my site onto a blog and then insert a link, and then taking the time to ping was not only starting to eat into my time but it was starting to become a a real pain! I want to use my time to create sites! For quite some time I've been searching around for an affordable solution. I knew there was a service available online that I could use that would do all the work for me- but, I wasn't too eager having to pay the amount being asked.. it was just too much for me, probably ok for others. I came across 2 pieces of software available that could handle the job, but found them either too expensive for me- or took the control away from me as to the schedule they were blogging and pinging on. So when I came across Instant Blog and Ping- which was way more reasonably priced for my wallet- I finally had the chance to get my hands on software that not only Automates all the work at a price I can afford, but I can run the jobs on my time- not some schedule that is set by the administrator of some other server! Seeing Yahoo Slurp in my Stats and MSN Spiders visiting my site using the blog and ping method always gets me excited.. now I'm even more pumped as I can set it and forget it. It does all the work for me. After using Instant Blog and Ping software, I saw spiders visiting my new site within 4 days! Using the Blog and Ping method "manually", my adsense income increased substantially. Now that I'm using Instant Blog and Ping- it has freed me up to focus on creating more sites. That alone has saved me a ton of Time and Money! Thanks Jon, for creating a program that's not only going to help me now and in the future, but it's also very simple to use. I also appreciate you offering

it a price that just about anyone can justify spending. Instant Blog and Ping also has an extra added bonus- it doesn't cause your wife to ask "How MUCH did you spend on that? You bought what?" :)

Thanks Again, James Comer -- Hi, I want to congratulate you on coming up with this breakthrough resource! It's a powerful and time-saving software that anyone interested in getting their entire site indexed fast have to use. One thing I'd like to comment is your world class customer service and responsiveness to customer enquiries...it's very rare these days! Sincerely, Ewen Chia InstantMarketingSecrets Click here to get your copy today, or continue reading... Think about it! A Software Program that completely automates the whole blog and ping process freeing you up to time into the areas of your business that you need to. Simply put, Instant Blog and Ping is like having a little automatic, money-making robot working for you, tirelessly.. day and night. See this is the thing.. Unless you have had your head under a rock for the past 12 months or your completely new to the internet, I'm going to go out on a limb here and assume you have heard about what Blog and Ping is, if not let me fill you in. Search Engine Optimization Junkies, Internet Entrepreneurs and Webmasters with the inside scoop have been Buzzing for months about a super fast method of getting your entire site pages crawled within a week, and even in some cases within a Matter of Days. But Blogging and Pinging Every Page is the Hard Part... You see the ever since the release of the famous Blog and Ping Tutorials months ago, the process taught people manually how to -- 1. Create a Blogger account at Bloggerand setup the settings (shown in software guide) 2. Create a my.yahoo account and take the RSS URL found in Bloggerand place it your MY.YAHOO account 3. Go back to your Blog and Post pages from the site you want crawled and indexed to the blog 4. Ping the Blog Aggregator like Yahoo and place like Pingomatic and wala! Whilst this sounds simple enough ...and well ...it is if you have only 7 pages on your website and 1 website, but many people doing business online have lots of site and lots of pages, and not a huge whack of time to spend posting pages to their blog in set intervals. So people have been faced with 3 options Post every Page from your Site to a Bloggeraccount Manually Post every Page from your Site to a Bloggeraccount Using a Paid Service Post every Page from your Site to a Bloggeraccount Using Expensive Software Now, It could take you days if not weeks to post manually and cost you a small fortune paying out to a paid service or buying software that starts in the hundreds. So Instead of knocking yourself out trying to post every page one by one or saving up for software that your really not sure is worth the high ticket price. You can have a 24/7, Set and Forget, Search Engine Spider Magnet for your

Fact: Siliconvalley and Search engine watch reported in February 2003 that Google purchased Blogger Fact: Time Magazine reported in 2004 that blogging has become so popular that even Microsoft has launched its own blogging services called "MSN Spaces" Fact: Yahoo! has released their own place to blog called Yahoo! 360 Fact: Aol Has their own place to blog called AOL Journals With this in mind, here's why those facts are important to you. All the Major search engines see the value and potential of blogging evolving so much that Google purchased San Francisco company Pyra Labs who operated Blogger.com Think about this..Google owns bloggerso everyday it sends search engine spiders out to check out bloggerfor New Fresh Content.. and when it finds it. i.e Your Blog with all your website pages and postings.. Its as busy as cat on a hot tin roof, and this is not just my opinion. The truth is... There really is no need to submit your website pages to google as they will find you through the blog as they seek out fresh content. There is no need to spend $299 to get into Yahoo directory as they will be alerted to your blog and the links to your site the moment you Ping the content Who wouldn't jump at this? It really couldn't be any easier unless I pressed the buttons for you. That means, in about 2 painless minutes, you can have

pages posted and your blog pinged, without the effort " How much is time worth to your business?.." Remember... I mentioned at the start I would share with you why I asked my friend that question. Let me explain.. He was in a situation where he had several deadlines on projects that he was working frantically to meet and trying to save money and do all the work himself not only did he wear himself out but he actually figured out that he never profited from the projects as when he calculated how long it took him to do it minus how much he got paid, well.... he took a loss. Lets assume, you try to tackle Posting all your pages to your blog manually and each site has over 500 pages and you are posting every 18 mins, 2 pages. How many man hours is it costing you? Is it really worth it? when you can press a few buttons, minimize and let it do every single page for you. Okay, So Whats The Cost For This Incredible Software? Well I realize this software could sell for as much as $499. In fact if you was to ask around and find out how much it costs to use a web service online that blogs and pings for your business, you'd be charged somewhere in the neighborhood of $1,000 to $2,000 So at a bare bones minimum you're getting hundreds and thousands of dollars worth of service in one package for one fee. But I'm not going to charge you anywhere near that amount or even my minimum project price. In fact, your total investment for this fully automated desktop software is just $5.95 The Money you'll earn as result of having your website pages spidered and indexed fast can very easily pay you back hundreds if not even thousands of times your meager investment. So what's the catch? Why am I practically giving this software away? Well, it's really quite simple.
