

# London Train Station Ambience Quiet #3 Sound Effect Sfx

[DOWNLOAD HERE](#)

This 60" sound effect was recorded in a large train station late in the evening, well past rush hour. As such there is little hustle and bustle but instead the sound of groups of people chatting whilst waiting for their train. AT around 53" into the recording there is a drunken male shouting football-esque chants. See files 'London Train Station Ambience Quiet #1' and #2 for similar files and 'City Train Station Platform Concourse Announcer' for a much busier recording. All files on sale by Sevenleaf SFX have been recorded by professionals and are available for you to download as 16 bit 48kHz stereo wav files.
