Inspired by a blend of college alternative, traditional folk and guitar-driven rock, the music crosses established musical boundaries while preserving the catchy pop hooks and danceable tempos. 10 MP3 Songs POP: Power Pop, ROCK: Modern Rock Details: February: like the mix tape your high school sweetheart made for you in 1985. The songs on Cravings latest release, February, are as diverse as the bands stack of influences. With songs that give a nod to R.E.M.s Georgia twang, hearken back to U2s early Dublin days, and incorporate New Orders electronic/organic hybrid, February stands as a contemporary representation of the resurgence of the 80s postpunk sound. Brian Scanlons melodic crooning juxtaposes sweetly against a driving rhythm section and dark ambient guitar leads, while his vocal harmonies bolster Februarys hook-laden choruses. The bands sound is both appealing and understated, and is constructed from layers of subtle textures ranging from tambourine to full out electronica. From the jangling mandolin in Salmon Falls, to the epic strings in Change, Cravings February comes across like the mix tape your high school sweetheart made for you in 1985. Craving is: Brian Scanlon: Vocals/Bass Tim Deal: Guitar Brian Wiseman: Guitar Scott Harris: Drums/Keyboards
