"SAVE ME" heard on The OC. "The simple, stripped down arrangements showcase one of the most beautiful voices in music and the songs are fabulous, alternately hopeful and heartbreaking." Jude's new masterpiece. 14 MP3 Songs FOLK: Folk Pop, ROCK: Folk Rock Details: Hey, it's me, Jude. This is the new album, and we hope you love it. I'm pretty sure you will, but we're throwing the hope out there... Just like two years ago when I started with the "Sarah" cd as a true independent, I'm slowly getting all this together myself, so until we get some of the reviews from France translated to post here, I thought I'd just say hello! Um, this album was made without any record company troubles, and it's the most fun I've ever had recording. Lots of friends and professionals helped, but we were able to do the one thing that was most important, and that was to keep a lot of the record from being over-produced. More than half of the songs are one take, top to bottom. Sometimes we added a string or something after the fact, but it's a lot of me on the guitar and piano. If you've been coming out to shows for the past couple years you'll recognize lots of these songs, and if you haven't, we included a live track at the end to get you into the spirit! I love sharing these songs with you, and I love that you're out there - see you soon, Jude p.s. I'll replace this with a bunch of cool reviews soon.
