Allow yourself and your child to be swept above the trees and far away to a magical forest where you will learn to see human virtues in the very earth around you. 50 MP3 Songs SPOKEN WORD: Audiobook, NEW AGE: Meditation Details: In 1999, I walked across a pit of fire! I was at an Anthony Robbins conference down in Ft Lauderdale and learning about what a person can do if they only put their mind to it! Since that time, I've always been about trying to show children how character and attitude can heavily influence their lives. In school, I had many difficulties and was labeled early on as "learning disabled". This harmful label followed me through all of my schooling and made me feel somehow inadequate and less than whole. I overcame all of those challenges and successfully completed two degrees in medicine (paramedic/BSN). Since that time, I have written various articles for gaming magazines and role-playing companies. Over the past several years, I have begun the uphill task of creating alternative teaching methods and tools to promote character development. It is my wife's and my sincere hope to reach all children, but especially those labeled with "disorders" (ADD,ADHD,learning-challenged,etc)with our positive message that you can achieve anything with the right attitude and positive character! Angel Beay Yoga Stories are a suppliment to my wife's and my character yoga program promoting all that I've already mentioned, but this 2 CD pack is not exclusive to that program (although I highly recommend it. Check it out at angelbearyoga). These flowing stories wisk children away to the forest on the wings of Angel Bear, who shows them how human virtues and positive behaviors are in the natural world. This allows children the ability to understand positive character better, see how it is present all around them and see how these characteristics can lead to wonderful outcomes.
