Easy set up featured post. You just need minimal effort to set up you featured post and make your priority content you want to featured easy enough to sticky. The dark color scheme make your featured post (if you using this theme for your video games blog on wordpress) looks unique. As we now the video games reviews must be including rich colored image/screenshot and make it looks unique. There is tree box on the top available for your featured post. Easy set p your thumbnail. Resizing your image become easier with this theme; you can upload the picture and looks how you can easily resizing the image as you need to make it look suit with your blog style. You can set your image on different aspect ratio resizing. Easy to manage theme option All you need to edit and set this theme is not going to push you looking the code and getting headache with. You just need to go to wordpress theme option to change the color using color picker, change your blog columns (you can using two or tree columns) easily using checkbox, manage your ads (there is tree ads areas with different popular size all you need to optimize your online earning), and manage your navigation bar and stop editing the code to get your best wordpress theme for your video blog. Widget sidebar ready. Up to you if you want to use two or tree sidebar, this is same for

this nice theme, on meaning that you do not need extra work since both sidebars are widgetized. Add your logo to your wordpress theme If your blog is already life and you do not want to change your logo and you already have stable brand so there is no problem for you. You can manage your logo without any code. You can use text base title blog or using your logo image as well. Please not: without touching any single code. Super lean markup and CSS , makes advanced customization a pleasure. Support for WP-PageNavi and Subscribe to Comments plugins out of the box
