If The Beatles and R.E.M. were a safari ride, then The History Of Fishes would be the crooning parrots just off the safari path. 13 MP3 Songs POP: Beatles-pop, POP: Folk Pop Details: Bursting forth with a lush sparkle like a fine champagne, The History Of Fishes piles on the melody and texture like solid sedimentary rock. With a laidback yet catchy vibe, The History Of Fishes is the soundtrack to your Sunday afternoon gardening marathon. Alex Arrowsmith captures the depth of the '00s national mood on songs like "No Wonder" and "Borrowed Time" while burrowing further into the tunnels of the human soul on "The Ghost Of Swan Island" and "The Oil Fields." Arrowsmith taps into an edgy, polished sound while vigorously uncovering the road signs of our times. Even your neighborhood librarian can't deny this wholly original pop masterpiece.
