Electro industrial 10 MP3 Songs in this album (45:34) ! Related styles: ELECTRONIC: Industrial, ELECTRONIC: Synthpop Details: Hi, we are Code Machine and this is our project. We hope you'll enjoy it. Code Machines music is a mix between EBM and synthpop, with a hint of techno. Its the expression of true personal feelings and a reflection about our society and the world we live in. Code Machine sincerely thinks that electro music is a committed music, which should convey strong messages. Some people consider that electronic music is easy to make. Are we any less of a musician because we use synths, drum machines, samplers and computers ? Is photography any less of an art than paiting because the machine creates the image (eventhough the human is behind the idea and the composition) ? There is no hierarchy is music. Electronic music is also a means of expression and is in no way easier to make than rock.
