I am from the Eastern part of Nigeria(Imo State) born in Lagos and currently lives in Lagos Nigeria. My love for music started from childhood, later I discovered I have a talent for music from above. The urge is persistent and I decided to do something about it. Now, I write and compose my own songs mostly sentimentals blues and a bit of Rhythm and blues. I also got my inspiration from top rhythm and blues stars like celine Dione, Mariah Carey, Micheal Bolton, Whitney Houston, Phill Collins and the host of others in America and around the world. Currently, I have the album feelings. Songs included in this collection are: Feelings, people don't know the cause they do, shows nothing else but love, goodbye and today tomorrow. I performed at some night clubs and music festivals in Nigeria. Being an up coming artiste, I have not gotten the opportunity to perform abroad. After graduating from the University of Lagos- Nigeria, with a final Diploma in science laboratory technology(Microbiology/virology) and other science disciplines. I went into writing and composing my own songs. Travelling, meeting people, listening to music, wrting songs and acting is what I love doing. I pray to become a well known RnB Star.
