

Mp3 Steve Ballard - Libration

[DOWNLOAD HERE](#)

A mixture of Ambient, Soundscape and Space sometimes upbeat and at other times moody. 8 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Soundscapes Details: Steve is diving head first into the world of electronic music. Hopefully not breaking his neck in the process. "I've always had an interest in electronic music ever since I bought the LP and heard Walter Carlos on the new instrument called the Moog" Steve said in an interview with his alter ego. Steve has been hooked ever since and has been following the evolution of the electronic scene. A few years ago Steve bought his first keyboard and has been pounding away at it steadily. "I just figured I would throw my stone into this sea of music and watch it ripple" once again mubbling to himself. Steve has no classical training in music, other than playing clarinet throughout in his grade and high school years. The last year he was unceremoniously thrown out of the band after being caught necking with a female flutist in the practice room. A few dozen genre's since his first listening experience and producing mostly singles released on several sites for public download, some of which held #1 spots for several weeks, he composed and produced his premier EP found here. Plastic Cinema, whom has toured and opened for Moby and worked with Placebo, Dido and Gus Dugeon, recently commented that Steve's music was "Cinematic Brian Eno". I hope you enjoy my music!
