

Preloaded Ebook Store With 200 Products

[DOWNLOAD HERE](#)

This instant download is a complete automatic ebook website in PHP/MySQL. It is provided with a very easy shopping cart system pre installed. All you have to set up is your paypal user name and all products that are sold will automatically go to your paypal account. The site uses integrated IPN PayPal. IPN stands for Instant Payment Notification. What it means is that when someone wants to buy an ebook from your website, he can pay online with creditcard or PayPal and after payment he receives an automatic download link. You have to do nothing, just sit down and wait for ebooks to sell. The big advantage is that you don't have to know something about HTML or PHP. This script is completely automatic and everything is already in place. It makes use of a very easy backend, where you can set prices for your ebooks and upload more ebooks to sell. You can upload pictures and set a description what the book is about and you're done. I advise a little knowledge of MySQL. If you know absolutely nothing about MySQL you could always try or find some little help on some free forum like digitalpoint forum. The guys there are happy to help you out. Features ebook website I already mentioned that you can simply install your PayPal username. But it supports more payment methods. You could also use Payu, cPal, Nochex, Wordpay and Stormpay. Another income source can be Google AdSense. If someone is not interested in your books, he might click to another website and still make some money for you, how easy do you want it? Another feature is installing amazon affiliate links. If you don't want to buy your own supplies, use already proven ebooks that sell on amazon. If it sells on amazon, why won't it sell on your own website? Some other features are: *complete install guide how to make this website work with MySQL. All you need is hosting and a popular website name. *SEO optimised. It is already optimised for the search engine, this will save you lots of work. *Choose the currency you like, although I recommend using the USA dollar. *You get 200 best selling ebooks Pre Installed. Just set up the price and sell them. *Very easy and understandable back end to manage your ebooks and upload more products. *To give it a unique design, you can customise the colours and upload another banner if you like. *Automatic payment method accepting creditcards, paypal and many more. *Totally automated checkout system! *Purchase can only be downloaded once. No one can pass the download link around to friends. *Works with UK

Pounds, US Dollars, Euros, Australian Dollars or Canadian Dollars. *Create unlimited categories and subcategories. *Create newsletters and send them to your customers to give them discounts or noticing them for new products. *Automatic section where you can put your reciprocal links with other websites. *Editable About Us and FAQ pages that can be customized in Admin. *Editable pre-filled Terms And Conditions and Privacy pages.
