A creative blend of new age, world and sizzling rock wrapped in the unique Black Ether ambient style 11 MP3 Songs NEW AGE: Ambient, WORLD: World Fusion Details: Born of a concept that music should be felt as much as heard, Black Ether has been captivating listeners since 2001 with some of the most emotive electronic music ever produced. Like tendrils of long forgotten dreams, BE moves people in ways very few artists can, simultaneously touching on the human and spiritual conditions with a force that can be as soft as a feather, or like a sledge hammer to the brain. Reminiscent of acts like Delirium, Deep Forest and VAST, Black Ether has managed, however, to blaze its own sonic trail with a distinctiveness that speaks "Black Ether". Ethereal ambience, haunting melodies, tribal drums, sensuous vocals, soaring guitars and keyboard solos and a healthy dose of creative brilliance culminates in a sound that is timeless, emotive, and extraordinarily mind blowing. Renaissance of the Primordial continues the musical journey began in Oneness, but with more distinctive world, rock and down tempo textures that elevate the power of the Black Ether sound to even higher levels of aural genius. In the words of others: Black Ether...and his music.. Ahhh..you always create this fantasy...a dreamworld...for all to dwell. To me you always fulfill my innermost belief of what music is set out to be...all this nonsense that the real task of music is to describe the world around us..that it is a mirror of the world...and how ugly and emotionless it has become. I truly believe that music shall give us hope...nothing more nothing less....it shall paint pictures of new worlds beyond the horizon....it's the vehicle to transport us to those places ..and each time we return to the world of ours a little less of us comes back with us ...because an ever growing part of our emotions and intellect longs and stays in that dreamworld...which hopefully in due time becomes the only true reality. Or something like this...lol....nevertheless...this is a true description of the music you make! Spirit An incredible amount of spirituality goes into your music, its quite impressive. While

listening to this song I feel very peaceful and placid it invokes such tranquility. present moment conscious

It's not just music, it invokes so much more. angels unaware not your garden variety sweet, hallmark
sexless angels...but powerful and daunting and fearsome and beautiful creatures of god. They move with
the insistence of drumming and sing melodies both human and stringed. Mankind joins them,
worshipfully, in imitation, with voice and wind and drum trying to identify with their purpose. The immortal
and mortal chorus blend in harmony and intention. In becoming attuned to the angels, the mortal come
into tune with each other. mind blowing....this is the stuff of the ambient kings! Wow, what a
