Gajob.com 6 MP3 Songs ROCK: Modern Rock, ROCK: Emo Details: COBY BROWN The Police, Stevie Wonder, Thom Yorke, Dave Mathews. These are some of the comparisons being drawn from Coby Brown's first solo EP, Truth Shines, recorded with Gregg Wattenberg (Five for Fighting, Eve 6, Chantal Kreviazuk). Having spent three years playing to packed houses in New York City clubs, Coby and his band, The Coby Brown Group, put out their debut album Homesick. The album received rave reviews in the New York press but Coby was already imagining where he might take new songs outside the democratic confines of the band. 'Almost at once' he met Gregg, left the band, and moved out to Los Angeles. Their goal was to craft a bigger, bolder record that was also more 'stripped down' in terms of letting Coby's strengths as a songwriter drive the process. "I'm happy with how it's all turning out. Leaving everything I knew was a bit daunting but I saw this as 'opportunity knocking' so to speak, so... here I am."
