Sexually charged drunken ramblings set to space jams. 16 MP3 Songs POP: with Electronic Production, ROCK: Punk Details: Like so many other bands that have come before them, Commander Cool! manipulates sound over time to form what most like to call music. The band was formed in the winter of 04/05 by Joe Kickass and The Doctor of Rock as an excuse to hang around in front of a digital recorder, smoke cigarettes, and drink bourbon. The result? "See you in Hell, Motherfuckers!", a five song EP that introduced the world to a new and exciting way to think of lawn ornaments and plague artwork. After spending a year rocking as hard as anyone could possibly rock, Commander Cool! bought a synthesizer. This was viewed as another excuse to hang around in front of a digital recorder, smoke cigarettes, and drink bourbon. The result? Dance My Puppets, a sixteen song seventy-seven minute voyage into a debauchorous, self-abusive, drug-riddled space-time continuum just past the edge of what most people like to call rational thought. This journey will take you to where youve always wanted to go, but were wary of taking that many drugs.
