A progressive concept album featuring different time signatures, violin bow guitar and theramin. This album is trippy, great to party to and has very aggressive bass playing. Don't miss it. This is the real thing. 15 MP3 Songs ROCK: Progressive Rock, ROCK: 70's Rock Details: David James is a seasoned musician that is not to be pigeon- holed. One cd may be rock, the next a blues cd, the next a progressive rock cd, the next an acoustic cd. David plays all the instruments at professional level and sings all the vocals as well. He is currently working on a double album which will feature drum solos, blues, rock blues and more. This will be his fifteenth album and should be done in may or june 2005. David plays guitars, lead guitars, Slide guitar, violin bow guitar, theremin, keyboards, bass guitar, Drums, percussion, mandolin, bouzouki, Flute, harmonica and vocals in various styles. Beware...There are many David James artists, but my songs will speak for themselves. If you hear a david james doing hip hop, you can be assured it's not me!!! I'm a real music kind of guy and I believe the music industry has ruined what was created at the beginning. The industry used to be run by people who loved music. Now it's run by dollar hungry businessmen who just want to make a fast buck. They couldn't care less about the integrity of this art form. I have spent my whole life trying to put out a better product. I play all the instruments and am involved in the creation of this product from A to Z. Remember, when you hear a song for the first time, you may not catch it. Songs must be heard a few times before you may like them. That's how it's done on radio, it's played over and over until you get used to it. Don't let greedy businessmen decide what music you like. I like real music done by quality musicians and that's what will last. I doubt you'll ever hear of a classic rap station in the future, there's just no quality or substance there. David James
