

Mp3 Patrick Balthrop - Autopoetic

[DOWNLOAD HERE](#)

Gorgeous waves of ambient, microbeats 11 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Down Tempo Details: Patrick Balthrop uses real-time processing applications and customized software to produce electronic music. Unlike many of his Chicago House counterparts, Patrick constructs and assembles sounds between ten and one hundred milliseconds into microbeats. Balthrop's interactive, three-dimensional surround sound mixes and sound designs have been critically acclaimed. His songs have been placed in films, including most recently "The Regret", which will be heard at The Sundance Film Festival and the New York International Independent Film Festival. Patrick's software research has led to the development of performance based generative plug-ins, which through their interactions and transformations continuously regenerate and redefine the audio signals that produced them.
