

# Defect And Material Mechanics

[DOWNLOAD HERE](#)

0. Preface Drascalu - Configurational Forces and Gauge Conditions in Electromagnetic Bodies, C. Trimarco - Application of invariant integrals to the problems of defect identification, E.I. Shifrin, R.V. Goldstein and P.S. Shushpannikov - Material forces in finite elasto-plasticity with continuously distributed dislocations, S. Cleja-Tigoiu, - On application of classical Eshelby approach to calculating effective elastic moduli of dispersed composites, K.B. Ustinov and R.V. Goldstein - The anti-symmetry principle for quasi-static crack propagation in Mode III, G.E. Oleaga - Reciprocity in Fracture and Defect Mechanics, R. Kienzler - Configurational balance and entropy sinks, M. Epstein - Conservation Laws, Duality and Symmetry Loss in Solid Mechanics, H.D. Bui - An Anisotropic Elastic Formulation for Configurational Forces in Stress Space, A. Gupta and X. Markenscoff - Energy-based r-adaptivity: A solution strategy and applications to fracture mechanics, M. Scherer, R. Denzer and P. Steinmann - Variational design sensitivity analysis in the context of structural optimization and configurational mechanics, D. Materna and F.-J. Barthold - Bifurcation of equilibrium solutions and defects nucleation, C. Stolz - Theoretical and numerical aspects of the material and spatial settings in nonlinear electro-elastostatics, D.K. Vu and P. Steinmann - Distributed dislocation approach for cracks in couple-stress elasticity: Shear modes, H.G. Georgiadis and P.A. Gourgiotis - Phase field simulation of domain structures in ferroelectric materials within the context of inhomogeneity evolution, R. Mueller, D. Gross, D. Schrade and B. X. Xu - An Adaptive Singular Finite Element in Nonlinear Fracture Mechanics, R. Denzer, M. Scherer and P. Steinmann - Dislocation tri-material solution in the analysis of bridged crack in anisotropic bimaterial half-space, M. Kotoul, T. Profant, O. Sevecek and T. Vyslouzil - Study of the simple extension tear test sample for rubber with Configurational Mechanics, E. Verron - Moving singularities in thermoelastic solids, A. Berezovski and G.A. Maugin - Stress-driven diffusion in a deforming and evolving elastic circular tube of a single component solid with vacancies, C.-H. Wu - Mode II intersonic crack propagation in poroelastic media, B. Loret and E. Radi - Material Forces for Crack Analysis of Functionally Graded Materials in Adaptively Refined FE-Meshes, R. Mahnen - A Multiscale Approach to Damage Configurational Forces, C. Dascalu and G. Bilbie EAN/ISBN : 9781402069291 Publisher(s): Springer

Netherlands Format: ePub/PDF Author(s): Dascalu, Cristian - Maugin, Grard A. - Stolz, Claude
