

# The Challenge Of Attachment For Caregiving - , Brian Lake

[DOWNLOAD HERE](#)

The Challenge of Attachment for Caregiving describes a theoretical model for the development of caregiving that complements and also extends attachment theory. The model highlights the conditions under which adult caregivers can remain in a state of arrested development, impairing their own ability to give care and resulting in attachment problems for those who seek care from them. It shows how insecure attachment in childhood and adolescence impedes the development of caregiving and how, in times of crisis, even securely attached individuals need appropriate support in order to sustain their capacity to give effective care. Drawing on many years experience as clinicians and researchers, Dorothy Heard and Brian Lake explore in depth an aspect of human development which has profound implications for our future survival. Presenting its own challenge to both theory and practice, this book offers students and practitioners a new perspective on attachment.
