1;Preface;7 2;How to use this book in courses;21 3;Acknowledgment;25 4;Notation;27 5;1 Schwartz distributions;39 5.1;1.1 Introduction: Dirac's delta function $\delta(x)$ and its properties ;39 5.2;1.2 Test space $D(\mathcal{O})$ of Schwartz ;44 5.2.1;1.2.1 Support of a continuous function;44 5.2.2;1.2.2 Space $D(\mathcal{O})$;47 5.2.3;1.2.3 Space $D_m(\mathcal{O})$;51 5.2.4;1.2.4 Space $D_K(\mathcal{O})$;51 5.2.5;1.2.5 Properties of $D(\mathcal{O})$;52 5.3;1.3 Space $D'(\mathcal{O})$ of (Schwartz) distributions;63 5.3.1;1.3.1 Algebraic dual space $D(\mathcal{O})$;63 5.3.2;1.3.2 Distributions and the space $D'(\mathcal{O})$ of distributions on $\mathcal{O}$;64 5.3.3;1.3.3 Characterization, order and extension of a distribution;65 5.3.4;1.3.4 Examples of distributions;67 5.3.5;1.3.5 Distribution defined on test space $D(\mathcal{O})$ of complex-valued functions ;78 5.4;1.4 Some more examples of interesting distributions;79 5.5;1.5 Multiplication of distributions by C^∞ -functions ;89 5.6;1.6 Problem of division of distributions;92 5.7;1.7 Even, odd and positive distributions;95 5.8;1.8 Convergence of sequences of distributions in $D'(\mathcal{O})$;97 5.9;1.9 Convergence of series of distributions in $D'(\mathcal{O})$;105 5.10;1.10 Images of distributions due to change of variables, homogeneous, invariant, spherically symmetric, constant distributions;106 5.10.1;1.10.1 Periodic distributions;113 5.11;1.11 Physical distributions versus mathematical distributions;122 5.11.1;1.11.1 Physical interpretation of mathematical distributions;122 5.11.2;1.11.2 Load intensity;123 5.11.3;1.11.3 Electrical charge distribution;126 5.11.4;1.11.4 Simple layer and double layer distributions;128 5.11.5;1.11.5 Relation with probability distribution [7];132 6;2 Differentiation of distributions and application of distributional derivatives;134 6.1;2.1 Introduction: an integral definition of derivatives of C^1 -functions;134 6.2;2.2 Derivatives of distributions;138 6.2.1;2.2.1 Higher-order derivatives of distributions T ;139 6.3;2.3 Derivatives of functions in the sense of distribution;140 6.4;2.4 Conditions under which the two notions of derivatives of functions coincide;157 6.5;2.5 Derivative of product aT with $T \in D'(\mathcal{O})$ and $a \in C^\infty(\mathcal{O})$;159 6.6;2.6 Problem of division of distribution revisited;163 6.7;2.7 Primitives of a distribution and differential equations;169 6.8;2.8 Properties of distributions whose distributional derivatives are known;179 6.9;2.9 Continuity of differential operator $\cdot a : D'(\mathcal{O}) \rightarrow D'(\mathcal{O})$;180 6.10;2.10 Delta-convergent sequences of functions in $D'(\mathbb{R}^n)$;187 6.11;2.11 Term-by-term differentiation of series of distributions;192 6.12;2.12 Convergence of sequences of $C_k(\mathcal{O})$

(resp. $C_k(\Omega)$) in $D'(\Omega)$; 211 6.13; 2.13 Convergence of sequences of $L_p(\Omega)$, $1 \leq p \leq \infty$, in $D'(\Omega)$; 211 6.14; 2.14 Transpose (or formal adjoint) of a linear partial differential operator; 213 6.15; 2.15 Applications: Sobolev spaces $H_m(\Omega)$, $W_{m,p}(\Omega)$; 215 6.15.1; 2.15.1 Sobolev Spaces; 215 6.15.2; 2.15.2 Space $H_m(\Omega)$; 216 6.15.3; 2.15.3 Examples of functions belonging to or not belonging to $H_m(\Omega)$; 220 6.15.4; 2.15.4 Separability of $H_m(\Omega)$; 222 6.15.5; 2.15.5 Generalized Poincaré inequality in $H_m(\Omega)$; 224 6.15.6; 2.15.6 Space $H_0^m(\Omega)$; 225 6.15.7; 2.15.7 Space $H^m(\Omega)$; 229 6.15.8; 2.15.8 Quotient space $H_m(\Omega)/M$; 229 6.15.9; 2.15.9 Quotient space $H_m(\Omega)/P_{m-1}$; 231 6.15.10; 2.15.10 Other equivalent norms in $H_m(\Omega)$; 232 6.15.11; 2.15.11 Density results; 233 6.15.12; 2.15.12 Algebraic inclusions $(\cdot)$ and imbedding $(\cdot)$ results; 233 6.15.13; 2.15.13 Space $W_{m,p}(\Omega)$ with $m \leq N$, $1 \leq p \leq \infty$; 234 6.15.14; 2.15.14 Space $W_0^{m,p}(\Omega)$, $1 \leq p \leq \infty$; 238 6.15.15; 2.15.15 Space $W^{-m,q}(\Omega)$; 241 6.15.16; 2.15.16 Quotient space $W_{m,p}(\Omega)/M$ for $m \leq N$, $1 \leq p \leq \infty$; 241 6.15.17; 2.15.17 Density results; 245 6.15.18; 2.15.18 A non-density result; 246 6.15.19; 2.15.19 Algebraic inclusion $(\cdot)$ and imbedding $(\cdot)$ results; 247 6.15.20; 2.15.20 Space $W_{s,p}(\Omega)$ for arbitrary $s \in \mathbb{R}$; 247 7; 3 Derivatives of piecewise smooth functions, Green's formula, elementary solutions, applications to Sobolev spaces; 249 7.1; 3.1 Distributional derivatives of piecewise

EAN/ISBN : 9783110269291

Publisher(s): De Gruyter Discussed keywords: Sobolev rume Format: ePub/PDF Author(s): Bhattacharyya, Pulin K.
