

Kleinian Groups And Hyperbolic 3-manifolds

[DOWNLOAD HERE](#)

Collection of papers summarising the state of the art. Ideal for graduate students or established researchers. The subject of Kleinian groups and hyperbolic 3-manifolds is currently undergoing explosively fast development, with many old problems and conjectures close to resolution. This volume, proceedings of the Warwick workshop in September 2001, contains expositions of many of these breakthroughs including Minsky's lectures on the first half of the proof of the Ending Lamination Conjecture, the Bers Density Conjecture by Brock and Bromberg, the Tameness Conjecture by Kleiner and Souto, the state of the art in cone manifolds by Hodgson and Kerckhoff, and the counter example to Thurston's $K=2$ conjecture by Epstein, Marden and Markovic. It also contains Jorgensen's famous paper 'On pairs of once punctured tori' in print for the first time. The excellent collection of papers here will appeal to graduate students, who will find much here to inspire them, and established researchers who will find this valuable as a snapshot of current research. EAN/ISBN : 9780511059339
Publisher(s): Cambridge University Press Discussed keywords: Algebra Format: ePub/PDF Author(s): Komori, Y. - Markovic, V. - Series, C.
