

Phylogeography Of Southern European Refugia

[DOWNLOAD HERE](#)

Introduction.- 1. Twenty-five key evolutionary insights from the phylogeographic revolution in population genetics.- 2. Plant phylogeography based on organelle genes.- 3. Phylogeography of Southern European mammals.- 4. Longitudinal patterns in species richness and genetic diversity in European oaks and oak gallwasps.- 5. Refugia within refugia.- 6. Historical biogeography and conservation of the golden-striped salamander (*Chioglossa lusitanica*).- 7. The evolutionary history of the European rabbit (*Oryctolagus cuniculus*).- 8. Patterns of hemoglobin polymorphism [α -globin (HBA) and β -globin (HBB)] across the contact zone of two distinct phylogeographic lineages of the European rabbit (*Oryctolagus cuniculus*).- 9. Spatial genetic structure of an explicit glacial refugium of maritime pine (*Pinus pinaster* Aiton).- 10. Endemism in Sardinia.- 11. Are Macaronesian islands refugia of relict plant lineages?.- 12. DNA variation.- 13. Cross-section of a refugium.- 14. Current perspectives in phylogeography and the significance of South European refugia. EAN/ISBN : 9781402049040 Publisher(s): Springer Netherlands Discussed keywords: Biodiversitt Format: ePub/PDF Author(s): Weiss, Steven
